

All-A-Buzz

Pollinator Friendly Garden

- A. Narcissus Trumpet Yellow
- B. Scilla Siberica
- C. Allium 'Purple Sensation'
- D. Muscari Blue
- E. Anemone 'White Splendour'
- F. Allium sphaerocephalon
- G. Narcissus 'Minnow'
- H. Crocus 'Snowstorm'

Planting Guide

Where: Bulbs are ideal for containers, beds, borders, under light trees or planted among roses and other small shrubs. They enjoy sunny areas, but the flowers will last longer in partial shade. Good soil drainage is the most important criteria for success with flower bulbs; so amend heavy soil with peat, mulch and sand. Loosen the soil thoroughly before planting so the roots have space to grow.

When: It is best to wait until the soil temperature is below 16° C (60° F) before planting, usually October to November.

How: Dig holes 4 times as deep as the height of the bulb and spaced 6 times as far apart as the width of the bulb. See individual packages for detailed depth and apart planting instructions. **Drop** the bulbs in the holes pointy side up. **Cover** the holes with soil and in very cold areas add 2-3 inches of mulch on top of the soil.

After Care: Once the bulbs have finished blooming, remove spent blooms and allow the foliage to continue to grow and generate food for blooms next spring. Trim foliage to the ground level once it has turned yellow or brown.

For extra information visit www.horticana.ca

Store in a cool, dry frost-free place until planting! All bulbs must be planted FALL to enjoy SPRING blooms.
