

Hardy Roses

Garden Roses

Start the planting process
immediately upon receiving.

- A. Rose 'Hope for Humanity'
- B. Rose 'Hansa'
- C. Rose 'Winnipeg Parks'

Before planting rehydrate canes by trimming 2" off the roots of the plant. Then fully submerge the canes and roots in luke warm water for 24 hours. Start plants in containers indoors or plant outdoors once all chance of frost has passed and the evening temperatures are above 6C.

Planting Instructions

Preparation

1. Carefully trim 1/2" off the root tips with pruners.
2. Soak the whole plant overnight to re-hydrate

Planting

3. Choose a location that receives at least 6 hours of sun per day.
2. Amend heavy soil if necessary with peat moss and compost and water.
4. Dig a hole wide enough to easily spread the roots and at least 12" wide and 12" deep.
5. Create a small mound in the bottom of the hole.
6. Place the rose on top of the mound and drape the roots around it.
7. Fill in the hole with soil. The grafting joint should be 5-8 cm (2-3") below the soil level
8. Water. Continue to water as hydration is key to success with roses.

Summer

9. Water and remove spent blooms. After the first flush of flowers prune back the branches to the fourth leaf, to encourage repeat blooming.

Fall/ Winter

10. In the fall remove the faded leaves and debris.
11. After the first frost mulch with an 8" mound of soil at the base of the rose.

Spring

11. Prune out canes with winter damage. Then 1/3 of previous years growth from remaining canes.
